# View datasheet associated with a component

All components of the CERN libraries have a link to their technical documentation (datasheet). When the components are created their datsheets are systematically stored on \\cern.ch\dfs\Applications\Altium\Datasheets\. We have deliberately not included the websites addresses of the manufacturers, due to the possible changes of the link.

How to view the datasheet directly from the schematic.

Method N° 1:

Select the component and press the key « F1 » to view the datasheet.

Method N° 2:

Even if the component is selected or not, make a right-click on the center of it in order to access the popup menu, select "Reference" and click "Help" to view the datasheet
